

TRAJECT

4SC HERBICIDE

Same effectiveness on tough weeds.
Same application flexibility.
Easy-to-use liquid formulation.

Proven performance on tough weeds in a convenient liquid formulation

TRAJECT 4SC™ herbicide is a cloransulam product from Summit Agro USA that is super easy-to-use thanks to its convenient liquid formulation. TRAJECT 4SC is equally effective at managing troublesome broadleaf weeds as other dry formulations of cloransulam. Importantly, TRAJECT features the same broad application window on soybeans, allowing growers to target both pre- and post-use timings.

TRAJECT has all the power and flexibility growers know, but with the added convenience of a liquid SC formulation.

Registered crops and key weed targets:

Soybeans

- Marestail
- Annual morningglory
- Common ragweed
- Giant ragweed
- Velvetleaf
- Jimsonweed
- Venice mallow
- Marshelder
- Wild mustard
- Yellow nutsedge
- Sicklepod
- Smartweed
- Sunflower (common)
- Palmer Pigweed
- Lambsquarters

See label for complete details and application instructions.

TRAJECT 4SC Herbicide (4 lbs per gallon a.i.)	FirstRate® Herbicide (84% per pound a.i.)
0.5 fluid ounces	0.3 dry ounces
1.0 fluid ounces	0.6 dry ounces
1.25 fluid ounces	0.75 dry ounces

Enhance the power of your PRE-applied herbicide with TRAJECT 4SC

TRAJECT 4SC can be added to foundational PRE-applied products to provide supplemental control of tough weeds including marehail, lambsquarters and ragweed species. Plus, TRAJECT 4SC provides critical support against glyphosate-resistant biotypes in addition to expanding the weed control spectrum.

TRAJECT 4SC: a critical POST-applied weed control option

In the face of uncertainty with other POST-applied soybean herbicides, TRAJECT provides growers a flexible solution that can be used over the top to control many critical weeds species.

	Control or Suppression Postemergence (see label for details)	Weed Stage of Growth for Postemergence Application	
		Leaf Number (Optimum - Maximum)	Maximum Height (Inches)
Burcucumber	S	2 - 4	6
