

For Grapes, Berries & Small Fruit

Broad-spectrum insect control. Extensive performance benefits.

VERDEPRYN® 100SL insecticide brings grape, berry and small fruit growers a proven option for effective control of their key insect problems. Driven by CYCLAPRYN®, VERDEPRYN is an IRAC Group 28 diamide insecticide that provides grape, berry and small fruit producers a long list of compelling reasons why it should be your first choice for maximizing crop yield and quality:

- Broad-spectrum insect control across grapes, berries & small fruit
- Utilizes less active ingredient per acre compared to most other diamide insecticides
- Fast acting on contact and ingestion with long residual control
- Effective on both adults and larvae of chewing and sucking insect pests
- Excellent efficacy against Lepidopteran pests in grapes & berries
- Controls many insect pests resistant to organophosphate, pyrethroid and carbamate insecticides
- Excellent partner for Integrated Pest Management (IPM) programs
- Valuable tool for Insect Resistance Management (IRM) programs
