

# VERDEPRYN®

## 100SL INSECTICIDE

### Stone Fruit

## Broad-spectrum insect control. Extensive performance benefits.

VERDEPRYN® 100SL insecticide brings stone fruit growers a proven option for effective control of their key insect problems. Driven by CYCLAPRYN®, VERDEPRYN is an IRAC Group 28 diamide insecticide that provides stone fruit producers a long list of compelling reasons why it should be your first choice for maximizing crop yield and quality:

- Broad-spectrum insect control across grapes, berries & small fruit
- Utilizes less active ingredient per acre compared to most other diamide insecticides
- Fast acting on contact and ingestion with long residual control
- Effective on both adults and larvae of chewing and sucking insect pests
- Excellent efficacy against Lepidopteran pests in grapes & berries
- Controls many insect pests resistant to organophosphate, pyrethroid and carbamate insecticides
- Excellent partner for Integrated Pest Management (IPM) programs
- Valuable tool for Insect Resistance Management (IRM) programs

### Key Insect Targets in Stone Fruit

- Codling moth
- Obliquebanded leafroller
- Peach twig borer
- Cherry fruit fly
- Western cherry fruit fly
- Tufted apple budmoth
- Omnivorous leafroller
- Oriental fruit moth
- Plum curculio
- Japanese beetle
- Spotted wing drosophila
- Western flower thrips\*
- Stink bug spp.\*

*\*Suppression only*
